Thanks. cjm1997 New Cone Posts: 3 Joined: 18 Sep 2021 06:13 Postby cjm1997 18 Sep 2021 06:20 Hello everyone, Hoping the brain trust can help me out on this one. Tried opening VLC tonight, and it has all of a sudden decided to crash immediately upon opening. I get the error message "Ooops, VLC media player just crashed. Would you like to send a bug report to the developers team?" When I hit yes, the error message goes away, but nothing else happens. Already tried uninstalling, rebooting, and reinstalling with no luck. I'm at a loss. No video or MKV files are being played, only audio (WAV, FLAC, MP3, etc.) Anyone have any ideas?Thanks Last edited by cjm1997 on 18 Sep 2021 15:06, edited 1 time in total. cjm1997 New Cone Posts: 3 Joined: 18 Sep 2021 06:13 Postby cjm1997 18 Sep 2021 06:22 P.S. I'm running Windows 10 Professional, 64 bit Win4US New Cone Posts: 1 Joined: 04 Nov 2023 21:12 Postby Win4US 04 Nov 2023 21:36 It's not resolved for VLC current release or prior two releases! The fix didn't work for me. I uninstalled VLC, deleted any remaining files on C drive, ran registery repair to eliminate any VLC associated entries, deleted cache and preferences and each time (current and last two updates) I did that I got upon completion of new install and try to open media file that Ooops message as others have stated. I didn't have this problem until after I installed the latest Window update today for my Windows 10 Pro (64) system. This is ridiculous to have this problem on a clean install. It doesn't appear to submit the install error log when you say yes either with Outlook running or not. Please fix this so I can use it again. PS: I have three windows systems and all three have the problem after Microsoft's Cumulative (KB5031445) update today. wbtcpip Blank Cone Posts: 15 Joined: 13 May 2021 16:21 Postby wbtcpip 04 Nov 2023 22:53 it's this plugin audio_output\libmmdevice_plugin.dll that crash on vlc startup. I deleted that file and now vlc start normally dpatter3 New Cone Posts: 1 Joined: 07 Nov 2023 20:32 Postby dpatter3 07 Nov 2023 20:34 Was having the same problem, just installed 3.0.20 and everything is working as normal Return to VLC media player for Windows Troubleshooting Jump to Users browsing this forum: No registered users and 99 guests Microsoft Windows specific usage questions Forum rules Please post only Windows specific questions in this forum category. VLC media player version 3.0.20 Vetinari.VLC media player will not play any CD which includes "store bought" and "home made" When I click on the play button, the computer immediately returns to the desk top every time. This does not harm the computer software.VLC media player is my default media player through quite a few versions. It has never been uninstalled and re-installed and the settings have never been changed.This is the first time that I tried to use VLC to play a CD so I have no history of playing CDs on VLC media player using older versions of VLC media player.The computer will play all CDs on Windows Media Player without any problems.VLC media player will play DVDs both "store bought" and "home made"without any problems.There was only one VLC crash report request (pop up). There were no crash report requests after that for each time VLC media player refused to play a CD.Any help so that I can play CDs on VLC media player would be appreciated. Lotesdelere Cone Master Posts: 10363 Joined: 08 Sep 2006 04:39 Location: Europe Postby Lotesdelere 22 Dec 2023 13:03 Menu Media -> Open DiscThen make sure to tick the correct disc option (Audio CD) in the Disc Selection and the correct drive letter in Disc Device. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 23 Dec 2023 06:50 Thank you for your response.I followed your instructions and when I clicked the play button the computer immediately returned to the desktop and did not play the CD.There was no VLC crash report (pop up). Lotesdelere Cone Master Posts: 10363 Joined: 08 Sep 2006 04:39 Location: Europe Postby Lotesdelere 23 Dec 2023 15:49 Please run VLC from the command prompt with this command line for creating a log file: Code: Select allC:\path\to\vlc\vlc.exe --extraintf=logger --verbose=2 --logfile=C:\temp\vlc.log --logmode=text --file-logging and then paste the full resulting log here or on Pastebin.com or on Justpaste.it if it's too long.The destination folder must already exist and make sure that you have full access rights to it. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 23 Dec 2023 23:33 Thank you for your reply. I tried copying the command line using the c:/ prompt and the computer could not find the file. It would be appreciated if you could give me some instructions on to run VLC from the command prompt with the enclosed command line which would include on how to access the "command prompt' so I can create a log file. Information on the "command prompt" would also be appreciated.Clarification on what is meant by destination folder and where to find the destination folder would also be appreciated. Lotesdelere Cone Master Posts: 10363 Joined: 08 Sep 2006 04:39 Location: Europe Postby Lotesdelere 26 Dec 2023 13:55 You need to use and type the complete path to VLC.exe, usually C:\Program Files\VideoLAN\VLC\ or C:\Program Files (x86)\VideoLAN\VLC\ if you're using the 32-bit version.For the destination folder use one which already exists (or create a new one) and where you are absolutely sure to have full write access rights. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 27 Dec 2023 04:46 if I open VLC media player from the desktop, the CD will not play and the computer ends up at the desktop every time.If I open VLC media player from "C:\Program Files\VideoLAN\VLC\", the end results are unreliable. That is, sometimes the CD will play, other times VLC media player will not open and other times VLC media player will open and crashes.I need instructions on how to find the log in VLC media player and once i find out on how to access the log, I would appreciate instructions on how to use the log and how it relates to a destination folder.I have a 64 bit computer. Lotesdelere Cone Master Posts: 10363 Joined: 08 Sep 2006 04:39 Location: Europe Postby Lotesdelere 27 Dec 2023 13:38 We need a log file.Run VLC from the command prompt with this command line for creating a log file:Code: Select all"C:\Program Files\VideoLAN\VLC\vlc.exe" --extraintf=logger --verbose=2 --logfile=C:\temp\vlc.log --logmode=text --file-logging And as said before, the destination folder (C:\temp) must already exist and make sure that you have full access rights to it. mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 04 Jan 2024 07:13 I'm also having this problem when selecting the audio CD Tracks under Discs. It no longer works, possibly because the "file" URI looks to be broken for CDs? Not sure if the "file" URI used to work, but, for example, the following also doesn't work currently:"C:\Program Files\VideoLAN\VLC\vlc.exe" --started-from-file file:///D:(having a final, trailing slash doesn't change things, / or \) This also doesn't work:"C:\Program Files\VideoLAN\VLC\vlc.exe" --started-from-file file:///D:/Track01.cda However, using the "cdda" URI works. For example, this works:"C:\Program Files\VideoLAN\VLC\vlc.exe" --started-from-file cdda:///D: unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 07 Jan 2024 04:08 I followed your instructions to reset preferences the manual way and I could not get to step 2 to get a command prompt to type the exe. file. On clicking on "open" the computer screen flashed and reverted back to Outlook.Even worse, I now have a black VLC home screen rather than the usual white one. I understand that a black VLC home screen is not a good thing. My VLC media player will still not play a CD and reverts back to the computer desktop when I click "play".Any additional advice that you can give me would really be appreciated to get VLC media player play any CD. Also how do i get rid of the black screen? mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 07 Jan 2024 12:57 how do i get rid of the black screen? Try going to View and click on Playlist. Another option is to just use the keyboard shortcut, Ctrl+L. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 08 Jan 2024 06:21 Thank you, I was able to revert back to the white screen.Since my last post, I tried again to reset the preferences using the command prompt method. What ever I accomplished, had no effect on playing a CD using VLC media playerOn occasion, VLC media player will now crash with a crash notice at the start. I answered no to the crash report request and when I try again, VLC media player will start without crashing.Resetting preferences using Tools > preferences does not work to make VLC play CDs.I would appreciate it if you can send me a line by line procedure on using the command prompt method of setting preferences to default settings. I will then know if I have done this process correctly in the past. This is not easy for someone who has not done this process before and VLC media player does not indicate if someone is successful after Enter is pressed. mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 08 Jan 2024 16:44 Thank you, I was able to revert back to the white screen.Since my last post, I tried again to reset the preferences using the command prompt method. What ever I accomplished, had no effect on playing a CD using VLC media playerOn occasion, VLC media player will now crash with a crash notice at the start. I will then know if I have done this process correctly in the past. This is not easy for someone who has not done this process before and VLC media player does not indicate if someone is successful after Enter is pressed. I think resetting the preferences through the command line isn't going to be a solution to this problem. I think the problem is probably a bug in VLC.You can just as well go to Tools->Preferences and click on the Reset Preferences button, and maybe restart VLC. If that doesn't fix it, it's quite likely a bug in VLC that they need to fix. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 10 Jan 2024 05:42 I have tried the Tools > Preferences method a number of times with no success.So there must be a bug of some type in VLC."it's quite likely a bug in VLC that they need to fix" My question is who are "they" and how are "they" going to fix the "bug"? mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 11 Jan 2024 16:07 I have tried the Tools > Preferences method a number of times with no success.So there must be a bug of some type in VLC."it's quite likely a bug in VLC that they need to fix" My question is who are "they" and how are "they" going to fix the "bug"? I'm pretty sure it's essentially this bug: ... ote_238413It was reported five years ago, lol, and jbk commented on it then, and he added scope 10 months ago, so at least he's aware of it... unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 11 Jan 2024 23:38 The question still remains how do I fix this bug, if it can be fixed?Would uninstalling VLC and downloading the latest version of VLC resolve the bug problem or would this cause more problems than it would resolve? If this option is suggested, I would appreciate a link to download the latest version of VLC. mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 12 Jan 2024 19:30 The question still remains how do I fix this bug, if it can be fixed?Would uninstalling VLC and downloading the latest version of VLC resolve the bug problem or would this cause more problems than it would resolve? If this option is suggested, I would appreciate a link to download the latest version of VLC. No, it's not a bug with your configuration. It needs to be fixed in the VLC code for the Devices menu. As a workaround, try clicking on Media->Open Disc..., then select the "Audio CD" option button, and then click Play at the bottom. That still works for me. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 14 Jan 2024 22:09 Thank you for your suggestion. This does not work for me as VLC crashes to the desk top right after I click Play.Am I right to assume that I will have to live with the version of VLC that I have with its limitations on playing a CD until someone fixes the VLC code? mmortal03 Blank Cone Posts: 30 Joined: 31 Oct 2006 07:17 Postby mmortal03 16 Jan 2024 02:01 Thank you for your suggestion. This does not work for me as VLC crashes to the desk top right after I click Play. That sounds like more than one problem going on. Not sure if your crashing is caused by the same bug or not. Presumably, you've tried playing the CD with Windows Media Player, just to make sure that there's nothing more generally wrong with your disc drive? Am I right to assume that I will have to live with the version of VLC that I have with its limitations on playing a CD until someone fixes the VLC code? Yep, it's not fixed on the nightly builds, either, so you've just got to wait. unfinished Blank Cone Posts: 12 Joined: 26 Jan 2020 20:55 Postby unfinished 16 Jan 2024 19:11 My computer plays CDs without any problems with Windows Media Player.I will just have to wait until the VLC coding is improved to play CDs. Gnafu New Cone Posts: 1 Joined: 10 Apr 2024 23:18 Postby Gnafu 10 Apr 2024 23:54 Hi, I have the same problem: Trying to read an Audio CD results in a crash.The log file also gets truncated, notice the "Tryin" it is not a copy-paste mistake, it was the logfile being written during the crash. Continue playback? - > AlwaysSave recently played items is enabled.However, as I said, it doesn't always save the position. Something I forgot to mention is that I usually access mp4s from playlists. Punktuation New Cone Posts: 1 Joined: 11 Aug 2024 09:47 Postby Punktuation 11 Aug 2024 09:50 Thank you very much for answering. Continue playback? - > AlwaysSave recently played items is enabled.However, as I said, it doesn't always save the position. Something I forgot to mention is that I usually access mp4s from playlists. This has been happening for months to me, too. And I don't access files from playlists.It happens only a few times that VLC resumes playback from where I stopped. On top of this, I uninstalled VLC, rebooted, cleaned the registry with CCleaner, rebooted, reinstalled VLC, set the right preferences but the problem still persists.I also noticed that, if I try to set bookmarks as a workaround to this problem, they are not saved. aracuan New Cone Posts: 1 Joined: 26 Oct 2024 15:35 Postby aracuan 26 Oct 2024 15:39 Yeah I just stopped using VLC entirely because of this. Way too annoying to deal with constantly.I'll just find a player that's figured out the one feature I need to work reliably. Return to VLC media player for Windows Troubleshooting Jump to Users browsing this forum: No registered users and 100 guests Download Switches /S - Perform silent install/L= - Install specified language as default, for example Czech localization means /L=1029 Example Useful tips1) Find Locale ID for your language here VLC uses a Nullsoft installer, so the correct flag is /S, and not /s. The flag is case-sensitive, unlike other installers.Do not rename the setup file to "vlc.exe". The installer will perform a check to see if any VLC processes are running, and gets confused by seeing itself running under the wrong filename. If you are using the MSI version, the arguments are "/qn" Note that as of this writing, the latest version does not have an msi installer - I had to grab version 3.0.20.Russ Microsoft Windows specific usage questions Forum rules Please post only Windows specific questions in this forum category. I've just bought a new PC and I'm having some issues with VLC playback. Just about anything I try to play flickers my entire screen black. The video comes back for sometimes 20 seconds sometimes 2 seconds and flickers black again. I never had this issue previously and I'm not quite sure why I'm having it now. I have the latest drivers and the latest version of VLC. RTX 2070 and an I7 9700KF I can get the video to play fine on Windows GDI Video Output but everything else makes the screen flicker. I should add this only happens when the video is in fullscreen. Watching with the window maximised the video plays just fine. I'm not sure if this is a hardware issue or VLC issue but any help solving this would be much appreciated. main debug: VoutDisplayEvent 'mouse button' 0 t=8main debug: VoutDisplayEvent 'mouse button' 0 t=9main debug: VoutDisplayEvent 'double click'qt debug: Qt: Fullscreen state changedqt debug: Qt: Entering Fullscreenmain debug: VoutDisplayEvent 'fullscreen' 1main debug: resized to 2560x1440main debug: VoutDisplayEvent 'resize' 2560x1440main debug: VoutDisplayEvent 'resize' 2560x1440direct3d11 debug: Detected size change 2560x1440main debug: auto hiding mouse cursormain debug: auto hiding mouse cursormain debug: VoutDisplayEvent 'mouse button' 0 t=8main debug: VoutDisplayEvent 'mouse button' 0 t=9main debug: VoutDisplayEvent 'double click'qt debug: Qt: Fullscreen state changedqt debug: Qt: Quitting Fullscreenmain debug: VoutDisplayEvent 'fullscreen' 0main debug: resized to 2560x1419main debug: VoutDisplayEvent 'resize' 2560x1419main debug: resized to 2560x1385main debug: VoutDisplayEvent 'resize' 2560x1385main debug: resized to 2560x1367main debug: VoutDisplayEvent 'resize' 2560x1367main debug: resized to 2544x1328main debug: VoutDisplayEvent 'resize' 2544x1328main debug: VoutDisplayEvent 'resize' 2544x1328direct3d11 debug: Detected size change 2360x1328main debug: resized to 2560x1314main debug: VoutDisplayEvent 'resize' 2560x1314main debug: VoutDisplayEvent 'resize' 2560x1314direct3d11 debug: Detected size change 2336x1314main debug: auto hiding mouse cursormain debug: auto hiding mouse cursormain debug: VoutDisplayEvent 'mouse button' 0 t=8main debug: VoutDisplayEvent 'mouse button' 0 t=9main debug: VoutDisplayEvent 'mouse button' 0 t=8main debug: VoutDisplayEvent 'mouse button' 0 t=9main debug: VoutDisplayEvent 'double click'qt debug: Qt: Fullscreen state changedmain debug: VoutDisplayEvent 'fullscreen' 1qt debug: Qt: Entering Fullscreenmain debug: resized to 2560x1440main debug: VoutDisplayEvent 'resize' 2560x1440main debug: VoutDisplayEvent 'resize' 2560x1440direct3d11 debug: Detected size change 2560x1440main debug: auto hiding mouse cursormain debug: discarded audio buffermmdevice debug: state changed: 0wasapi debug: resetmkv debug: seek request to 36.85%main debug: Received first picturemain error: Timestamp conversion failed for 100310001: no reference clockmain error: Could not convert timestamp 0 for FFmpegmkv debug: seek: preroll{ track: 1, pts: 1349350000, fpos: 446428770 skip: 446428770} mkv debug: seek: preroll{ track: 2, pts: 1350101000, fpos: 446646754 skip: 446646754} mkv debug: seek: preroll{ req: 1350172556, start-pts: 1349350001, start-fpos: 446428770} main debug: Buffering 0%main debug: Buffering 1%main debug: Buffering 2%main debug: Buffering 3%main debug: Buffering 4%main debug: Buffering 5%main debug: Buffering 6%main debug: Buffering 7%avcodec debug: available hardware decoder output format 119 (cuda)avcodec debug: available hardware decoder output format 53 (dxva2_vld)avcodec debug: available hardware decoder output format 118 (d3d11va_vld)main debug: Buffering 8%avcodec debug: available hardware decoder output format 174 (d3d11)avcodec debug: available software decoder output format 0 (yuv420p)main debug: Buffering 9%avcodec debug: reusing decoder output format 0main debug: Stream buffering done (5838 ms in 19 ms)main debug: end of video prerollmain debug: Decoder wait done in 9 msmmdevice debug: state changed: 1main debug: auto hiding mouse cursormain debug: auto hiding mouse cursormain debug: VoutDisplayEvent 'mouse button' 0 t=8main debug: VoutDisplayEvent 'mouse button' 0 t=9main debug: VoutDisplayEvent 'double click'qt debug: Qt: Fullscreen state changedqt debug: Qt: Quitting Fullscreenmain debug: VoutDisplayEvent 'fullscreen' 0main debug: resized to 2560x1419main debug: VoutDisplayEvent 'resize' 2560x1419main debug: resized to 2560x1385main debug: VoutDisplayEvent 'resize' 2560x1385main debug: resized to 2560x1367main debug: VoutDisplayEvent 'resize' 2560x1367main debug: resized to 2544x1328main debug: VoutDisplayEvent 'resize' 2544x1328main debug: resized to 2560x1314main debug: VoutDisplayEvent 'resize' 2560x1314direct3d11 debug: Detected size change 2336x1314 Ghillie New Cone Posts: 3 Joined: 07 Oct 2019 19:10 Postby Ghillie 07 Oct 2019 19:23 Had to remove some of the useless debug info to make the post work. but thats all i get in my log which makes me feel like it might be a hardware issue. That i have no idea how to fix Teigh New Cone Posts: 2 Joined: 12 Oct 2019 22:08 Postby Teigh 12 Oct 2019 22:17 Hey all.My pc uses Windows 10 and my vlc player literally doesn't have a menu. I searched for ways that'll help me get the menu to appear but found hence I ended up here. And I also need help with videos that don't play. I tried watching a series episode; the video ends up freezing on the same scene but the sound continues playing without hassles. The video is an mkv file. What can I do? Teigh New Cone Posts: 2 Joined: 12 Oct 2019 22:08 Postby Teigh 12 Oct 2019 22:20 I don't know which vlc version I'm using but when I right-click, the only thing that appears is "play/pause, stop, audio, video and playback" only. The settings tab is also not so helpful. Return to VLC media player for Windows Troubleshooting Jump to Users browsing this forum: No registered users and 100 guests
