To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. That means we will get a small fee if you make a purchase through the links, without any additional cost to you. Support Canon Watch. Amazon calculates a products star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers and factors that establish reviewer trustworthiness. Please try again later. Anand 2.0 out of 5 stars Actually i bought this camera for my friend. Does this camera worth 31K. Lets see PROS 1. Its easy to use 2. Decent battery backup 3. Live mode operation is not lagging. CONS 1. While focusing the DSLR is making too much noise and its the kind of annoying that u will lose interest in taking photos. 2. No shortcut or assigned button to change F stop aperture.

A manufacturer who is keeping dedicated button for changing the ISO have to thing about the importance of aperture. 3. You cant change the focusing point by pressing the round dial in the system, if u press it some other setup will open up. 4. The output image quality is actually not mind blowing. 5. White balance Use it if u want to take risk 6. Main issue. If u use camera flash to snap a pic during focusing it will flicker like anything and it will annoy and irritate the subject 7. Noise Noise Noise. Whatever low ISO you use noise will b there and when i went to service center to ask about this they were saying use a prime lens to get good output. I am a Nikon user i have Nikon D3400. I compared both cameras by taking same images with same settings in manual mode. The output from Nikon is better than Canon 1500D. In one word if want to push photography to next level from using a Point and Shoot or mobile camera to DSLR Or to learn the whole DSLR setting go for it only with a mindset to change the camera in 1 or 2 years. As canon accessories are comparatively less costly than Nikon it wont create hole in ur pocket. I am not biased towards Nikon, i wrote wat i felt. Its not worth for moneyEasy to handle, wifi is advantages. Price is little bit high.Useful for inhouse, nature, functions, and spare time photography. Take high quality pics, videos, portrait, landscape wildlife, nature pics etcWe logged the complain on canon India site and not bothered to reply. So we have a DSLR that is producing blur images and canon is not providing any proper service. stay awayAwaiting early reply. Regards.But Adopter has not been given along with the DSLR which is a very common accessories.
