After letting it soak for a few minutes you should be able to pull at a small corner if you can get one loose. Work in a well ventilated room. A mixture of dishwashing detergent and water can be applied to the paper. Wet the wallpaper well and then let it sit for a while. When you pull on it, the sections should come off in large pieces. Steamer Older wallpaper is easier to remove with a commercial steamer. And it isn't always easy. Hold the iron in place against the paper until the paper is loose enough for you to pull off or peel off using a scraper. Continue to pull away at the paper. Sometimes it takes more than one try at it to succeed. Tools Before you get started you should gather a few supplies that you'll need and put them within arm's reach. Many home improvement stores rent out the steamer system that you use for wallpaper removal. Mountain Images & Pictures Sendungen 3.2: Staffel 2! Wallpaper was all the rage in decorating years ago but now that the trends have changed people are left finding the best ways to remove it. Make sure you wear protective gloves if you decide to do this method. Once the paper has all been removed from the wall, you may have to work to remove any additional smaller pieces. The entire process will be extremely hot so proceed with care. Take Care of Your Walls When you're removing old wallpaper remember not to cut too deep with the scorer or work too abrasively with the putty knife or you could damage your wall or the sheet rock underneath. Collect a drop cloth to spread on the floor, a scraping tool, a putty knife and a ladder if you'll be working in areas that will be above your head. Because you'll be working with a hot steam iron and hot water will drip down the wall, remember to wear protection so you don't burn your hands. When you return, the paper should be easily removed with a scraper. Several factors will determine the task's difficulty level. If you have a drop cloth laid down around the floor you can let the paper fall away and gather it all at one time, making clean up a snap when you're finished. Soap and Water Sometimes wallpaper can be removed by using just soap and water without purchasing any additional tools and supplies. For example, you'll want to consider how long the wallpaper has been on, what brand it is and the surface it was applied to. Solvents get the job done, but they have a really strong odor that can get on your hands.
