You made me very happy. I also really like the miniature that appears in the last fill as far from the minor ruling offered in other paintings by numbers games. You can get your creative juices flowing. So, so beautiful. You get 75 different photos to color. I like the graphics, I like that you can change from one color to the other without releasing the cursor. And this is the best I've ever seen and the first I've been willing to pay. The graphics are beautiful; love. I really like all the games of painting in big fish. This has a few new features: * Contained color: You can hold the mouse button and drag the mouse over a section and color all at once, it is not necessary to click on each small that © to be blue (or anything else) Natural Painting: You can choose the wide brush and just put the color where you move the mouse (instead of filling to the edge). personally, this is not attractive to me , but if you want to feel like you're really wearing a brush, it's * free ink: After completing a photo, you can get into free paint and do it again with any color you want, what it's something I wanted and I'm so happy that they added :) This makes such a good pause when the intense games I usually play is very, really recommend that you try, even if you do not think you wish you can be surprised Happy painting! I like to look at the beautiful landscape that has come to life after painting for the numbers and staying in the work of art finished infinitely because I do not paint on that last point as I am in the museum looking at your beauty. I'd love to see more of these games, please. Date Published: 2020-12-02 Rated 5 out of 5 by gcole42 What fun and relaxation! I did not think I could get into the painting for a number, but I changed my mind. The photos are beautiful, some silly and fun, while others are absolutely beautiful.
