Completing the Black Hole Challenges in Shugasu Ug Requires Strategic Planning and Preparation paraphrased text here The idling community is eagerly awaiting updates on the game mod. A concerned gamer inquired about the removal of the unlimited god power cheat, and MrAntiFun clarified that it was removed due to unknown reasons. The Instant Might cooldown cheat has been added, but its functionality is unclear. Users are still searching for the Super Might option and experiencing issues with game compatibility. A player suggested adding a time acceleration modifier, which would allow players to speed up their progress in-game. Others have proposed new cheats, such as instant upgrades, RTI, and spacemid. The community is also seeking information about penalties for cheating, with one user mentioning that the "Cheating God" title is the only consequence. The Idling to Rule the Gods mod has been updated several times, but users are still experiencing issues. Some players have reported that the cheat doesn't work or keeps turning off automatically. Others are wondering if there will be any new mods added in 2025. A user asked about the possibility of adding a game speed multiplier option, which would allow players to accelerate their progress. MrAntiFun provided insight into the Super Might option, explaining that it sets Total Might to 1.0e14, effectively increasing stats by a large multiplier. However, this increase is not noticeable in late-game progress. The community has also discussed potential new mods, including Super Crystal Power, Super RTI, free experience for pets, game time acceleration, and automatic TBS clicker. The topic remains active, with users sharing their strategies and discussing the pros and cons of each mod. One user shared their god power strategy, detailing their current stats and options. They are seeking advice on the most effective God Power option at 48k spent and 8106 crystal power. The community is engaged in a lively discussion about game mods, cheats, and strategies for progressing through Idling to Rule the Gods. Cloning and Clone Counts Are Key: A Guide to Progression in the Game With more clones and better stats, NRC challenges can be completed in under 24 hours. To maximize progress, it's essential to start with easier challenges and switch to harder ones as needed. The main goal is to finish each challenge for +50% to all monuments bonus. The most challenging challenges are LCC and OCC, requiring significant growth and specific pets. CBC, on the other hand, can be completed more easily but still requires a substantial amount of clones. DBC is another essential challenge for climbing the gods, but it's not recommended until you've completed more difficult challenges. To succeed in DBC, having a good DivGen and creating many Universes are crucial. With enough growth, pets, and clones, you can overcome any obstacle. However, some challenges still require specific conditions or skills. 1 First you need to Scan Unknown Initial Value. 2 Spend 1 God power. 3 Go back to Cheat Engine. and change Scan type to Decrease Value by and put 1 (coz you spend 1 GP) 4 repeat steps 2 and 3 until you'll see 1 Address. the value will be different every time you try to hack GP sometimes the Value will be + 12 of your original GP or sometimes + 30 . btw its always random. 5 now you only have to do is to freeze the Value... and go buy stuffs just 10 below would do 6 but every each attempt please save your progress so that you'll see the limit of the freezing coz there will be a limit exceeding your limit will trip the cheating god 7 Exit the Game and run again... and do the steps from 1 - 7 ok guys this should do it Has a major change happened to this game There was not a single datatype from which I could find any value hey any chance for a new update plz dosnt work just says game is off Page 2 Game was updated to Version 3.16.1035 Name of .exe changed from irtg.exe to Idling To Rule The Gods.exe I think thats one of the reasons the old ones doesnt work anymore New Trainer would be great if you know how to use CE Good Power always have some add to it and each time is new one so you need to look for one number that is change in increment of one in my 11 tests add number is from 14 to 45 i dont know how upload file so hire is Link to my Cheat Table if creator of trainer can use to update his trainer Please use it hi could you please add a possibility to specify god power number instead of plain 999999999 Praey For The Gods V0.5.025 Trainer +6 Options Inf.Health Inf.Stamina No Exhaustion No Hunger No Cold Inf.Upgrade Points Notice first go into game world and move a bit then activate trainer and cheats so we are paying 6\$ a trainer now . +1 for this hidden gem that deserves more love especially after the d\*\*k move Bethesda pulled on them Joined Apr 20, 2014 Messages 26,112 Reaction score 34,768 Quest of Dungeons V1.1.0 Trainer +4 Options Inf.Health Inf.Mana Inf.Gold Mega Exp You must log in or register to reply here Current Trainers Idling to Rule the Gods V10.19.2016 Trainer +2 Idling to Rule the Gods V02.22.2017 Trainer +2 Idling to Rule the Gods V05.06.2017 Trainer +2 Idling to Rule the Gods V10.23.2017 Trainer +2 Idle Champions of the Forgotten Realms V0.96 Trainer +1 Idling to Rule the Gods V03.17.2018 Trainer +2 Idling to Rule the Gods (Steam) 12-15-82 Trainer +2 Idling to Rule the Gods (Steam) 12-27-83 Trainer +2 Idling to Rule the Gods (Steam) 12-30-83 Trainer +1 Idling to Rule the Gods (Steam) 1-2-85 Trainer +2 Idling to Rule the Gods (Steam) 9-1-85 Trainer +2 Idling to Rule the Gods (Steam) 4-6-87 Trainer +2 Idling to Rule the Gods (Steam) 11-7-88 Trainer +2 Idling to Rule the Gods (Steam) 4-26-96 Trainer +2 Idling to Rule the Gods (Steam) 12-16-97 Trainer +2 Idling to Rule the Gods (Steam) 6-15-98 Trainer +2 Idling to Rule the Gods (Steam) 1-6-00 Trainer +2 Idling to Rule the Gods (Steam) 8-24-01 Trainer +2 Idling to Rule the Gods (Steam) 5-11-02 Trainer +2 Idling to Rule the Gods (Steam) 10-20-02 Trainer +2 Idling to Rule the Gods (Steam) 1-18-03 Trainer +2 Idling to Rule the Gods (Steam) 5-10-04 Trainer +1 Idling to Rule the Gods (Steam) 5-12-04 Trainer +1 Idling to Rule the Gods (Steam) 10-10-04 Trainer +2 Idling to Rule the Gods (Steam) 6-30-05 Trainer +2 Idling to Rule the Gods (Steam) 12-12-05 Trainer +2 Options Notice activate mods after entering the game world Last edited Feb 12, 2025 Love the trainer Is it possible to add an Inf. Lucky Draw The Inf.God Power activates the cheat detection so lucky draw or the other booster you can get might give you the same affect without triggering the cheat detection Love the trainer Is it possible to add an Inf. Lucky Draw Inf. Lucky Draw is great Ugh i think they patched this possibly Every time i press the hot key it makes the invalid key sound thing Doesnts activate It worked when i got it but not anymore For those who want to cheat without being caught your soft cap for shadow clones rebirth screen hover over max clones can be edited with cheat engine but only up to around 500k initially at 99,999 go too high and you will be a cheating god Think it was 4 bytes but use scan all to be safe Scan original number beat 3 gods buy +1000 clone cap. Down side is you still have to grind max clones to the cap. 4 days in and its only up 50k As soon as I am finished with my UAC ill be testing to see if you can cheat the lucky draws Have 30 waiting now Back again with another cheat engine tip You CAN edit the progress on monument building without tripping the cheating god However making much difference is above my skill level A large number in 4bytes increases as you work on a monument. Once this number gets above a certain point which varies based on progress it triggers something and drops massively If you edit it to much you reset the number to the The address remains the same, allowing for a fresh start with minor adjustments. On a 24-hour basis, shaving off 15 minutes from the process is achievable without triggering the cheating god's wrath. Be cautious not to make excessive changes, as this can result in setbacks of up to 10 minutes. Fortunately, there is good news: the current address does not change, making it easier to revert to a previous state if needed. Hoping that someone with more expertise than myself can utilize this information to create an enhancement that boosts build speed, I present another tip for cheat engine users. While editing the progress on monument building may trigger the cheating god's attention, it is possible to avoid detection by making subtle adjustments. A significant increase in a 4-byte value can occur as you work on monuments. Once this value surpasses a certain threshold, it will drop significantly. Editing this value too much can reset it to its previous state, rendering efforts futile. In a recent experiment, shaving off approximately 15 minutes from the process was achieved over a 24-hour period. However, trying to make excessive changes at once resulted in setbacks of up to 10 minutes. Thankfully, the address remains unchanged, enabling easy reversions if needed. One crucial observation made during this trial was that editing the value to its highest point (4294967295) results in the value resetting to 0 or 1 after a short period. The impact of the number of clones on the value is minimal, with values above 99999 triggering the cheating god's detection. It appears that having more progress than others may allow for larger value adjustments without detection. However, this can lead to difficulties in finding the optimal value, as seen in my current cap of 201k. Furthermore, the game updates regularly, with some versions featuring up to three bug fixes per week. This frequency poses a challenge for trainers and cheat engines alike. In conclusion, escaping the cheating god's wrath requires patience and persistence. A novel approach involves scanning unknown initial values, spending one god power, and repeatedly decreasing the value by 1 until reaching an address of 1. Freezing this value allows for temporary access to boosters while avoiding detection. Save progress before attempting this method and be prepared to exit and re-enter the game. Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies, I came across a trainer that could help rule the gods in Idling To Rule The Gods V10.19.2016. The trainer has +2 idling and various options like Inf.God Power and Super God Might. However, there's an issue with the current version not working properly due to cheating. A user asked how to escape Cheating God when trying to cheat the God power using Cheat Engine. To do this, you need to follow these steps: 1. Scan Unknown Initial Value 2. Spend 1 God power 3. Go back to Cheat Engine and change Scan type to Decrease Value by and put 1 (coz you spend 1 GP) 4. Repeat steps 2 and 3 until you'll see 1 Address. 5. Now, only freeze the Value, go buy stuffs, but make sure not to exceed a certain limit to avoid triggering Cheating God. 6. Save your progress so that you can track the freezing limit 7. Exit the Game and run again, then repeat steps from 1 - 7 Some users also mentioned changes in the game's version, such as Version 3.16.1035, where the name of .exe changed from irtg.exe to Idling To Rule The Gods.exe. A new update would be great if possible, especially for a new trainer that could use Cheat Engine. Some users asked about adding features like specifying God power number instead of plain 999999999. Lastly, some users shared their experience with the game's current state and how it has changed over time. The latest patch on September 13 has been live since last patch 09/13. Thank you for your work. xgetdabxz Noobzor Posts: 14 Joined: Thu Nov 04, 2021 1:33 am Reputation: 1 Post by xgetdabxz » Thu Nov 04, 2021 1:34 am does this table activate the cheating god tag when enables/activated? pallen0304 What is cheating Posts: 3 Joined: Sun Aug 19, 2018 7:55 pm Reputation: 2 Post by pallen0304 » Fri Nov 05, 2021 7:22 pm They just updated the version of Unity the game uses, all addresses have moved. Idling to Rule the Gods Cheat Codes (ITRTG): ----- Submitted by: David K. How to do ultimate baal challenge in less than 24 hours: ----- Written by Philly4eva The all u need 6 rebirth guide to ubc. This is intended for midgame and assumes u already played the game for atleast one year. If u are just starting out, u will need more rebirths to complete the challenge, but could pick up some ideas along the way. - ==Preparation==: This guide will supply a do list for the 6 rebirths it will take. It will use one rebirth around 9 hours and four rebirths around 3 hours and lastly one might run rebirth. -=Recommended challenges= \* 25 cbc (for 50 ghost might levels, very helpful) \* 20 nrdc (for faster and better dungeons, very helpful) \* 20 nrc (for faster planet eater spawning, allowing u to kill the first one and two around the time might unlocks, very helpful) \* 25 pbc (for building 40 monument upgrades instead of 20, very helpful) \* All "day challenges" (for various bonuses, very helpful) \* 45 uuc (for faster powersurge, helpful, but could do without) \* 40 1kc (for faster might training, helpful but could do without) \* 25 tmc (for some extra stats while training might, helpful but could do without) \* As many cpc as possible (for less creating time and clones assigned on crystals, helpful but could do without) \* As many aac as possible (for some extra stats + rebirth multi, helpful but could do without) -=Recommended pets/gear=- \* Enough pet gear to have 50% boost to hitpoints/physical/mystic and as much gear as possible to have or be close to 50% creating and building speed. \* As for pets u need evolved nightmare and evolved flying spaghetti monster for godpower camp and evolved clam with a mountain d3 team. \* All evolved adventures with bonus to godpower camp helps too. \* 1x v1 chakra Pills per challenge to speedup rebirth 3. \* Improved next at and improved next at for challenges will also make your life easier. \* You will need 2x rebirth bacon per ubc, craft some beforehand. \* If u have pandoras box unlocked, it will help out alot in the gp camps. \* Using magic sticks, or sticks/candy canes in general on your godpower camp pets will make it easier. \* You also need auto half stats and xp overflow bought from challenge points. -=Strategy=- \* Assuming u have around 40k growth on your 10 godpower campaign pets u will start every rebirth with fighting clones. It will take 5-10 minutes depending on growth to reach \* 100m stats. This will ensure your godpower camps will be good. \* As for actual numbers, some things will be slower or faster depending on where u are in the game, hopefully it can still be useful even if u cant follow everything. \* It will be a lifesaver if u assign pets to camps and dungeon teams beforehand and can just click on the auto button. \* The guide will keep 25 godpower, this is to buy 99999 for 3gp at start of a new rebirth, to buy divinity twice for 5gp and to rebuy clones from dieing to planet eater 4 times per rebirth. -=Rebirth 1: The road to Pontus=- 1.Adjust the godpower slider to 100% physical while waiting for 56 clones. 2.Assign 56 clones to training physical and mystic, 28 in each. 3.Wait about 1-2 minutes then start training pets on clones, with few clones in the start u have to refresh this often, do this until u reach 10 min in the rebirth. 4.Send out all your pets to 9 hours of godpower campaign and dungeon teams, the rest of the pets I usually send to item/growth/food as nothing else really helps. You can use divinity camp if u want, but it's not really needed. 5.Assign clones to battle, u will not need most of the clones at all for first rebirth so use the little u have for battle. 6.Create 500 light, 500 stone, 250 soil, 150 air as they become avialable, then focus on creating clones. It's worth going offline at this point until the rebirth is done. Before going offline make sure it's set to creating clones. 7.As the pets finish their camps/dungeons, Unleash and kill Pontus, then buy 10k clones 4 times for a total of 100gp. Buy buildspeed for the rest of your godpower, down to 25. 8.Send all your clones against planet eater, killing them all, then rebirth.you will be creating alot of these rebirths and it might be tight on time so get started asap if u did a 9 hour rebirth in rebirth 1 and then went offline you will have the offline creation speed boost making this easy assign 56 clones to train physical and mystic 4 assign clones when they are up to fight your pets when all or most in your godpower camp have 100m stats send them out to 3 hours camp if the rebirth reaches 10 min send them out regardless of stats send out your non-mountain teams to 3 hours and your mountain team to 9 hours and 24 minutes make sure u have atleast 2x rebirth bacon equiped on the mountain team assign clones to battle as they become sub -1000 capped create 3000 light 12250 stone 250 soil 1350 air 450 water 100 plants then focus on creating clones while waiting for the creations dump all your unused clones on powersurge and train it until might is unlocked when might is unlocked assign clones to train might levels build 2 mighty statues followed by 1 mystic garden as the pets finish their camps dungeons unleash and kill nephthys then buy buildspeed down to 25 godpower as u did before send all your clones against godly tribunal killing them all then rebirth respawn, kill it again. Spend 100 energy on mystic crystals, then turn on divinity shield. 13.Start creating physical and mystic crystal. Doublecheck so divinity shield is turned on. 14.As the pets finish their camps/dungeons, max out and equip your two crystals. Turn off the divinity shield afterwards. 15.Unleash and kill Luna then buy buildspeed down to 25 godpower as u did before. 16.Send all your clones against godly tribunal, killing them all, then rebirth.
