With our tutorial, you'll learn how to use latex in no time. Lessons step by step help in creating a fast and simple document. You do not need to download or install an editor, you can follow most of the tutorials immediately in your browser. Latex is a markup language for composing documents. It excels at making math and general layout beautiful. Learn how to create high-quality academic documents. Explore all the features with practical tutorials and code examples. Free. With latex, do the formatting & then focus on your content. This guide will show you, that beautiful composition is easy and hassle free. Use the Latexa € improve both the appearance of your documents and your productivity. The volume of scientific research that is published is constantly increasing, making it harder and more difficult to get an accepted manuscript. The language quality plays a particularly important role in ensuring the success of a presentation. With Elsevier Language Moditing, get support from a native speaker at the PhD level to ensure that your presentation is in proper English, increasing the chance of success. Our editors have gone bad. Wait a moment and try again. Latex, or natural rubber latex, is a common ingredient in many products they use every day, including gloves, pacifiers, balloons, athletic shoes and even condoms. It's almost impossible to avoid the latex, since © 12 million tons are produced annually, and more than 40,000 consumer products contain latex. For people sensitive to latex, their immune system has an allergic response à à hypersensitive to proteins that occur naturally in the SAP used to make the latex. An allergic reaction to latex can be as mild as a rash and a stuffy nose or a life-threatening anaphylaxis. In the late '80s, the Centers for Control and Prevention of Diseases (CDC) recommended universal precautions to protect healthcare workers from pathogenic blood-based. As a result, the use of medical supplies and gloves, latex-based, that provide a barrier protection, has increased significantly. There followed an increase of latex allergies. Allergies are an abnormal response of the immune system against substances called allergens. Latice is an allergen and regular contact with latex can cause allergies. What puts healthcare workers and patients undergoing more medical procedures at high risk because © many medical supplies contain the material, including surgical and examination gloves, medical catheters and tubes, elastic bandages and wraps, and even stethoscopes. Worldwide, the prevalence of latex allergy is by 9.7% between health workers and 4.3% among the general population. People born with Spina A birth defect in which the spine does not develop properly, has up to a risk of 73% latex allergy due to frequent latex exposure from medical procedures and surgical interventions. There are three main types of latex allergies: mediated IgE-mediated latex allergy (type I): this is a protein allergy à €
