In support of this week's worldwide release of Grand Theft Auto V, Rockstar made available a special pair of totally free companion apps that will be available for download starting today to enhance and aid your game experience. Grand Theft Auto: iFruit - featuring Los Santos Customs and Chop the Dog The free iFruit mobile app hooks directly into your Grand Theft Auto V experience featuring: Los Santos Customs - The Los Santos Customs app offers players the freedom to create their ultimate vehicle in Grand Theft Auto V from anywhere. At the bar, on the beach, on the toilet. This is the future, we're almost sure of it. You can even create and reserve custom license plates for both Grand Theft Auto V and Grand Theft Auto Online - order your personalized plates before they're gone! Also choose from paint jobs, window tints, smoke colors, wheels, hoods and spoilers. Upgrade your engine, brakes, exhaust, suspension, and accessorize with new lights, horns, tires and body armor. Place your order on-the-go and find it waiting for you in the garage the next time you play Grand Theft Auto V, or send your order in while playing and get a call from your local mechanic to swing by. Everybody's had some work done in Los Santos, so don't let your ride be the exception to the rule. Chop the Dog - Depth of content, high production values, defecation. It's the app that has it all. Because who doesn't love tending to a virtual pet? Chop is Franklin's canine sidekick in Grand Theft Auto V. Look after him well in the Chop the Dog app and you will reap the benefits when playing as Franklin in Grand Theft Auto V. Pet him, feed and water him, play fetch and tug-of-war, teach him tricks. Too much or too little of an activity, however, will cause Chop to become unhappy, and nobody likes an unhappy Rottweiler. Take Chop on walks to give him a chance to work off last night's steak and Pilswasser and to mark his turf in the hood - defending his ladies, fending off gang members and even protecting the beach babes of Los Santos from unsightly tan lines by removing their bikinis. The iFruit App is now available for iOS devices at the App Store, for Android devices via Google Play, for Windows Phone and for PlayStation Vita. An application where users can read about the game, the characters, the settings, the music, tutorial guides and more. Not only is this app informative but the aesthetics are high quality with a sleek streamline interface, navigation to each section is made easy with a pop up menu on the right side and text that is easy to read although for those who can't see that well it would be nice to have customization. From the start the app sets you on the right course as you choose what platform you are playing the game on and what language it is set in. From there you are able to explore the app as you see fit. There is a good wealth of content included in the application concerning information of all kind. The only area that I can tell that could use more data is Grand Theft Online. Maybe in the future this section will be beefed up. Besides that the app seems to fire on all cylinders. If you are a owner of this game, you need to own this manual. But after reading a lot of the comments on this app I could not not do this. I have downloaded this to post a comment. The shear amount of single digit IQ in these comments is insane. This app is called GRAND THEFT AUTO: THE MANUAL. Meaning it's a MANUAL or a companion app to the game. This is not the game. Maybe in a few more years you will be able to play this game or you might be able to play it on the cloud right now but when all these reviews were posted years ago. There is no way you could play a game this massive and graphically intense on your phone. You have people asking for gta 3 for free from a company that is out to make money. You have people that say they have this on their ps5 but now they are not at school and stuck at home. Lol so then play it on your ps5. These comment are just incredible and make my head hurt. I also have no hope for humanity if this is what we got. Learn to read it will help you in life and understanding basic things like the word manual. I think this manual is very well put together, it really helps during gameplay to find cop shops and other places otherwise not listed. One thing I could see making this all the more better is maybe a map where you can put your own locations down? If there was a spot I liked to hide out or anything of that nature, it would be awesome if I could go to the map on here and find my marking, instead of finding a location each time. Other than that request, I think the manual would be amazing! The developer, Rockstar Games, indicated that the app's privacy practices may include handling of data as described below. Gallery[1] References[1] In a world where game manuals are slowly becoming extinct, I was extremely happy upon opening my copy of GTA 5 to be greeted by not only an instruction manual, but also a full map. Thus, in some ways, it is odd that Grand Theft Auto V: The Manual app even exists. Which is not to say that it isn't welcome, choice is always good, but it does seem a little unnecessary. All the options Starting the app you get a choice to select the desired language and the platform you own the game on. Once this is done, the app offers little over its paper counterpart. Rather than flipping between pages, you can select the sections menu, which is brought up by tapping the icon at the top right of the screen. This is handy for finding out how to execute specific tasks, but not so useful if you just want to browse through the settings. A new view Bringing up the control page, you are able to handily pick between default options (such as driving or on foot) from a drop down menu, but other than that it makes no use of its digital format. You can't press a virtual digital button and bring up all possible commands tied to it, or search for a specific task and have its inputs presented. It's a half step that is made redundant by the existence of the physical manual. The one interesting and useful element of the GTA V: The Manual is in the map. Here you can switch between three different views - atlas, satellite, and road - to give you a clear view of the world. You can also filter activities and points of interest. It may not be necessary, but it is the one element of the app that really feels like it adds something.Ultimately pointless Grand Theft Auto V: The Manual makes a lot of sense for those who bought the game digitally, as it saves them exiting it to access the digital manual. Really though, thanks to a good tutorial and a well laid out interface in the game, this app feels a little superfluous.
