# A cotton picking minute

Where did a cotton picking minute come from. Wait a cotton picking minute cartoon. A cotton picking minute meaning. How long is a cotton picking minute. What does a cotton picking minute mean.

The first to ever break open a watermelon must have thought they hit the jackpot (let's put aside the fact that the jackpots might not have been a thing back then). Full of water to quench thirsty and fleshy fruit to fill your belly, more comes in your anti-time package? Thank you, Mother Nature! But it's that solid rinsing that makes it hard to guess what's inside: is it ripe and juicy or dry and pasty? Here's how to tell if a watermelon is ripe, more tips for storing the watermelon and favorite watermelon recipes. Related: What to do with an Overripe, Mealy Watermelon Watermelons grow on screws that run along the ground, developing a light colored patch on their bottom side where the sun does not reach. Collect a watermelon and look for that patch, also called a field. If it is creamy yellow, this indicates that the melon was ripe when it was chosen. If it is white or green, it was probably chosen too early and is not mature. And no, watermelons don't ripen after they're harvested. A mature watermelon will feel heavier than expected when it lifts. This weight is due to the high water content â up to 92 percent. Like a mature watermelon, it actually loses the weight of the water and becomes dry and pasty. So if it looks too light, it's not fair. Since watermelon growers can vary in color from very dark green with no stripes to fairly pale with streaky green stripes, the rinsing vegetable is not the best indication of ripening. If you're looking at a whole display of the same kind of watermelon, just look for a fairly smooth skin. A little gnarlyness is ok â after all, he spent his life lying in a field â but there should be no cracks, bruises, or mushy spots. The overall surface should be opaque instead of glossy (too glossy means it is not mature). And check that yellow field. Some swear by this: A mature watermelon sounds hollow when it touches it. If it's moss inside, the sound will be mute. Despite your best efforts in choosing a perfect melon, you could still end up with a watermelon whose inner flesh has broken wide open. This condition is called an empty heart, and while it might be discouraging to watch, it does not affect the taste or quality of the melon. Agricultural scientists thought it was caused by periods of irregular growth in the industry, but now suspect a lack of pollination that led to a failure of seed production. Fun Fact #1. Watermelon seeds were found in the tomb of Tutankhamun, who ruled Egypt from 1332 to 1323 B.C. It was common practice to put watermelons in royal burial chambers to provide nourishment in the afterlife. So that's what you say if a watermelon is ripe. Now let's take a look at some varieties of watermelon. Ask a child to draw a watermelon, and you'll probably get the usual green And red on the inside. But, with more than 1,200 varieties out there, watermelons come in many shapes, colors and flavors (not all are sweet). Related: All about Yellow Watermelons In Japan, Japan, have developed a square watermelon, designed for easy storage in your fridge. And they didn't stop there; they also have watermelons in the shape of a cone and a heart. Customers pay a lot for the novelty, of course.And while one of the greatest pleasures of childhood is seeing how far you can spit watermelon seeds, the crossbreeding has produced seedless watermelon. Fun Fact #2. Yes, you can roast the watermelon seeds the same way you can roast the pumpkin seeds. After all, they share the same family tree. Watermelon is harvested from the vine when it is ripe, so it is best to eat it within a week of buying it at the supermarket. If you buy it fresh from the field or at a farmer's market, it could last up to three or four weeks uncut. If you can't eat it right away, keep it in a cool place.A piece of cut watermelon should be wrapped tightly in plastic, stored in the refrigerator and consumed within one or two days.Serve the sliced watermelon to your stove? Put it on ice to keep it cool and fresh for food safety. Related: How to cut a watermelon made fun #3. A monster melon from Tennessee holds the world record for the heaviest watermelon. Grown in 2013 and weighing over 350 kilos, it was the pride and joy of Chris Kent, who spent about four hours a day taking care of his melons. (Probably to keep them from attacking.) Watermelon is both delicious and nutritious. It's a good source of lycopene, a potent antioxidant, and it's classified as an anti-inflammatory fruit. Plus, you're eating natural moisturizing electrolytes and vitamins A and C for healthy skin and hair. A cup of watermelon contains only 46 calories, which you can burn by throwing a huge watermelon around for 10 to 15 minutes. Fun Fact #4. Can you freeze watermelon? Yes and no. You can make watermelon ice cubes by cutting the fruit into squares and freezing them on a lined baking sheet. Once the cubes are frozen, transfer them into a zip-top freezer bag. They are great for refreshing drinks but not for eating, they lose their crisp consistency during the freezing process. Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! The pickup lines are generally used to show interest in another person, but they can range from being extremely corny, funny and also sweet to excessively sexual and degrading. Here's a look at a wide range of pickup lines used in well-known movies and by famous people, as well as a couple of tips on how to actually use a pickup line. The pickup lines have been around for decades and have even made it into mainstream media. Michael Curtiz's film, Casablanca (1942), is a classic romantic film that has stood the test of time. While the orchestra is playing in the background on an unfolding romantic scene, Ilsa, played by Ingrid Bergman, looks into the eyes of her old flame, Rick Blaine, played by Humphrey Bogart, and says, or my heart beats?" Classy. Another Rom/Com, Hitch (2005), is full of pickup lines. One of the most memorable beings, "I couldn't help but notice that she looks a lot like my next girlfriend".Thelma and Louise (1991), has a scene in which cowboy JD, played by Pitt tells Thelma (Geena Davis), "I may be an outlaw, darling, but you're the one stealing my heart." And what about this classy line in Couples Retreat (2009). "Do you have a cell phone I could use? Why? Someone needs to call God and tell him one of his angels is missing. "Collecting lines are not only used by the average Joe. Ray Kroc is said to have used this phrase once or twice: "Looking at you on the dance floor made me think maybe you could use some fries with that smoothie, I turned McDonald's into a nationwide chain of restaurants, so I have a lot of fries and smoothies. Bob Marley, a reggae musician, was known for his flirting personality with women and is said to have used the line "Are you Jamaican? Because Jamaican drives me crazy. Even Neil Armstrong had a couple of lines in his back pocket. I was the first one here. If by that you mean the moon... The success or failure of a good shooting line depends heavily on the personality of the liberator and the receiver. For example, suppose someone goes to a person and says, "Do you get sunburns, or are you always this hot?" An extremely extroverted and energetic person may react completely differently than someone who is shy and more introverted. . Some say that extravertes and more energetic personalities are attracted to people who tend to use humor or pickup hotlines. While everyone will respond differently to the withdrawal lines, there are some general tips that will get you started in the right direction.First, be original. There are jokes that people have heard over and over, and you don't have to use them because it'll just show that you can't even invent your own pickup line. Second, be funny and sometimes self-deprecating to make the person laugh and not appear presumptuous. Third, be observant; include something relevant or current in pop culture. Not only will it be a line, but also a little understanding in your interest and personality.Finally, make sure you carry it well. First impressions are crucial and it's important to keep eye contact, smile, be honest and create a connection that hopefully helps keep the conversation going. Before you blur a sentence to someone, consider how you'd feel if someone came up to you and told you. If you think it's a good line and choose to use it, be careful with the receiver body language. If there doesn't seem to be any interest, know when to leave. More importantly, if you want to use a pickup line, be true to yourself. Make sure the line you invented represents your personality. If you like trivial pickup lines and want to date someone who likes trivial pickup lines, then this is the way to go. go.
