A nice addition is the ability to view content on your favorite topics. High quality video, free streams and option to record the best moments directly into the memory of your Android device make this app unique on Android market. In fact, you get a TV with hundreds of different well-known TV channels and a selection of content for every taste. If you enjoy watching videos on your phone or tablet, you can also download Hotstar and Netflix. DOWNLOAD MOD APK Overall Info Category:Entertainment Developer:Mobdro Version:2.9 Size:19 Mb MOD Info:Unlocked Premium Requires Android 4.4+ Features: Despite having dozens of competitors in video streaming category, Mobdro has managed to carve out its niche thanks to several key features. We suggest considering them in more detail. Unique content collections If you think you can use Mobdro to watch TV series or movies on demand, then you are deeply mistaken. Technically, this feature is present, but in a slightly different form. For example, if you want to watch a movie from Marvel or DC cinematic universe then you will not be able to find streams for this request. However, several channels are available to your attention at once, broadcasting content you requested around the clock. You may not be able to get desired film or episode immediately, but with the help of TV program, you can always know when to launch the app again. Channels from all over the world In addition to watching amateur selections, you can also try to watch streams of the most famous channels of almost all categories. Mobdro offers you news, sports, fashion, cooking and a dozen other different sections, each of which includes about 100 channels. Any user can find here not only the most popular TV channels in excellent quality, but also their amateur versions. The app can also offer channels with unique selections by sport type, news category and more. In general, each viewer is able to choose something for himself. Free option to watch videos without ads Mobdro developers offer users a unique interchange experience. After first launch of the application, you can start using service without advertising in exchange for providing computing data of your device for mining cryptocurrencies. In other words, app directs resources of your device towards personal goals of the developers in your free time. As a rule, these are cryptocurrency mining and other similar schemes. In this case, your personal data stays anonymous and the only fingerprint on your part is IP address. On the other hand, if you do not want to overload your Android device, you can always refuse this offer. However, all streams will contain third-party advertising. Record your favorite streaming moments Another interesting feature of Mobdro is the ability to record any stream directly into the memory of your device. Whether it is breaking news, tense moment in sports match or just favorite moment in movie, you can save it free. Just open the settings and tap record button - nothing else is required from you. It is worth noting that original version allows you to download a limited amount of content. However, using premium version of Mobdro can easily solve this problem. Mod Description As mentioned above, the app operates on a Freemium basis, offering premium features using device-computing power. However, if you are not eager to participate in mining and also do not want to watch ads, then we can offer you to download our mod. Its use allows you to get premium features free. For example, you can watch any content without ads, download unlimited number of videos and use a sleep timer. Mod Testing Our team has tested the mod for Mobdro and can guarantee its full functionality. Already at the first launch of, it becomes clear that all functions of Premium version work without problems. We also draw your attention to the fact that installation file does not contain viruses and malware, so you can use it on any device without any problems. Now let us take a closer look at capabilities of the modified version. No ads. No mining or other suggestions for using your hardware. You can view any content without annoying advertisements. Smart timer. Use this feature to turn off your device at certain times. This is especially convenient for those who like to fall asleep while watching TV. Just set a kind of alarm clock and the app will turn off the stream by itself. No download restrictions. Modified version of Mobdro removes all restrictions on downloading video content while watching. Get your favorite moments or even entire movies without any restrictions. Improved download speed. In addition to the fact that you can download at least a low quality content in the world, you can also do it much faster than in original version. With access to high-speed servers, you can always download videos faster. Connecting via Chromecast. If your device and TV have Chromecast functionality, then you can easily cast image directly to big screen in the highest quality. This is where the smart timer function comes in handy. Our Summary If you do not like to choose your own program schedule for evening, then Mobdro can do it for you. Just choose the most suitable content category and watch whatever your heart desires in the best quality without ads. How to Install Mobdro Mod APK? We made everything to ease downloading process for every visitor of our website. However, if you download modded or hacked app from third party sources for a first time, the following how-to-do guide may be useful for you: Press download APK button to start download process. After its completion, open your file manager and select the necessary application file mobdro-technifiser.com.apk. In case of installing APK file for the first time, your device may ask you several permissions. In order to allow installation process you have to open device settings and switch on "Allow from this source" tab. After the app installation completion, it becomes available for playing! Don't forget to delete original Mobdro before installing our modified version to prevent errors during installation process. DOWNLOAD MOD APK
