Read more >> Author Mihir M. Patel is based in Mumbai, India. It is a chemical engineer (SMEs). Practice chemical engineering exceeding 34 years in the process security and engineering. Furthermore, he is a PROJECT MANAGEMENT PROFESSIONAL (PMP®) from SMEs, USA, which gives it an overall perspective of the unique project in addition to the process perspective. It is also a South TUV certified functional safety professional. It started in July 2015 when he was in Qatar, Doha who works in a consultation. He believes that he is a grace of God, his fortune and the inspiration that gave him strength to write this complete book. Him wife encouraged and supported him wide. He wrote this book with a vision to help all the levels of chemical engineers to carry out the engineering of chemical processes in a very practical, efficient and simplified way. She used him almost 2.5 years to perfect this manual and launched at the beginning of 2018. What is a composite compilation of all the key aspects of chemical engineering. Within less than 2 years, it has become popular globally, with readers who are immensely benefited from it. Read more >> You are reading a free preview Page 3 is not shown in this preview. It also demonstrates how to solve the main problems related to the process that cultures in the practice of chemical engineering. The chapters are organized so as to allow students to acquire an in-depth understanding of the theme. The accent is given to the units and conversions, to the basic concepts of the calculations, to the material equilibrium with / without chemical reactions and the combustion of fuels and energy budgets. In addition to numerous illustrations, the book contains numerous problems and solved exercises that fill the gap between theoretical learning and practical implementation. All numerical problems are solved with blocking schemes to strengthen the understanding of concepts.
