It is dark, hollow and sad and the atmosphere does a great job to give the player the sensation that they are trapped in a distopic world, driven by technology and sombrah. Nor is there anything more irritating than having to keep the cancel button to run during the whole game; Completely unnecessary. Final Fantasy VII is usually listed as the game that inspired the massive popularity of many follow-up games in the Final Fantasy series. Maybe it was only me ... the character who stood out for most players was the main villain and antagonist of history, Sephiroth. From the first interactions from the beginning in the game, where he and the main characters are friends, to see it slowly they go crazy about the realization of who is, to the final battle against him in the nucleus of Planet (namely, the very scene). Was not it bothered anyone else for this? Create an effective antagonist and do it, as well as the writers of the game, it is not an easy task and congratulations for what they could achieve. Final Fantasy VIII and Final Fantasy IX had final leaders and villains who basically appear out of the air and are not involved in most of the plot (of each respective game). Any support that could be provided, or even a rapid thank you note sent in my own way, is very appreciated. The main plot does not take away too far from its typical science fiction adventure; A young and reliable main character joins a team of misdapted in an adventure to save the world. They manage to make a miraculous escape, since most Shinra soldiers in the building are killed by a mysterious Ā e ĩ , → "in black, presumed by the cloud to be his former teammark ʼsotelpmoc
